

Data locations for Microsoft cloud services

Thanks to new possibilities and great cost-saving potential, the topic of cloud computing is becoming more and more important for Swiss schools. To ensure that the necessary data protection requirements are met, it is important that special consideration is given to the aspect of data location. This document will help you to find the necessary information on this topic.

As with Office 365, Microsoft Azure services provide the option to select the location of your data centers. The [Microsoft Trust Center](#) provides detailed security, privacy and compliance information for all of our Microsoft cloud services. Visit these pages for the most up-to-date information:

- Here you can find a list of all [Microsoft cloud services data locations](#).
- For an overview of [Office 365 data locations](#), select the location of your company from the drop-down menu. The map shows you the locations of data centers for Office 365 tenants in the EU. Beneath this you will find a detailed list of locations for the respective Office services.
- Visit [Azure data centers](#) for a geographical overview of the Azure regions. Furthermore, in the [overview of all Azure services](#) you can find out about the data centers in which Azure services are available. Select the appropriate region from the drop-down menu.
- The data locations of [Microsoft Intune](#) and [Microsoft Dynamics 365](#) are also listed in the Trust Center.
- The Microsoft Trust Center also contains a comprehensive [list of certifications](#) for Microsoft cloud services.
- See in this [guide](#) (only German) how you can ensure data location when setting up Microsoft cloud services
